

## MGEC Representatives

MGEC is an organization made of members. The State of Minnesota has long recognized the its engineering staff bring to the work they do. MGEC members value their opportunities for contribution and have supported the organization that represents them. MGEC leadership places a high value on its relationship with the people it represents. To improve and maintain the union relationship between members, MGEC is developing key people to facilitate members participation with MGEC. Those people have been asked to be a first contact between MGEC and new hires as well as existing employees. To facilitate worksite meetings of MGEC members. To assist in communication, problem identification and a referral source to employee MGEC board leaders and staff.
